Hi Michael,

I'm looping in Omar, too, as he's helping me with Central Count.

I have availability on Friday from 12:30-3pm at this moment. Omar, what is your availability?

Thanks!

Claire

---

Hi Claire,

Couple things for you:

1. Do you need any PPE, either for poll workers/your staff or for voters? We have a few partners offering masks, face shields, gloves and hand sanitizer.

2. We need to schedule a follow-up to go over Central Count training with you and Mike.

   Does tomorrow (11-1 or 2-4), Thursday afternoon (after 3:30), or Friday afternoon (12-3) work? Can also look at next week if that would be better.

As a reminder, we discussed covering:

   - steps for resolving discrepancies between the ballot count and machines (do you call this reconciliation?)
   - recommended processes
   - frequently-asked questions
   - other topics for the training video and other materials

Hope your week is going ok so far. Feel like with all the legal uncertainty, the only thing to do is to just keep pushing forward and hope it doesn't lead to complete chaos.

Michael

Hi Claire,

I hope you are well and surviving or more as we approach the elections.

I am reaching out as NVAHI wants to help amplify the great work you are doing and help ensure your voters have access to the best information so they can successfully cast their vote this fall. Polling and research show that local officials like you are the most trusted source of information and will help cut through the noise about voting this election cycle.

We are filming a series of informational, digital videos we will promote in your community and would love for you to participate. These videos will be non-partisan (as always from NVAHI) and focused on direct information sharing. If you are able to, we will set up a 60 minute filming session on zoom where we will pre-record: a 30 minute conversation as well as a series of 20-30 second scripted videos. We will also give you copies of the videos to use on your own channels as you see fit!

We will cover topics like: How to request a mail ballot (or explain that one will be mailed automatically), how to fill out + return your ballot, How to track your ballot as well as ask you to talk about yourself and why you do this work. We can follow up with more information if you are able to join us.

With the election fast approaching, we are looking at recording Oct. 3-7 so we can turn this around quickly.

Thank you so much for your time, I look forward to hearing from you.

Subject: Warehouse Open House Video Production Questions

Hi Claire,

Saralynn and I met with the video production team yesterday and we wanted to confirm a couple of aspects of the event and provide the team with additional details:

- Will the PPE equipment be laid out on a table or will there be someone wearing the PPE to demonstrate how poll workers will look? My plan was to do both. To show what a poll book receiving table looks like with the plexiglass, the PPE our poll workers will have available, and then also have someone demonstrating (if desired) wearing a face mask and face shield and sitting behind the plexiglass.
- Will there be voting machines at the warehouse with demonstrations as to how they will be sanitized? We can set up an express vote machine (available at early voting) and demonstrate that voters can use a pencil eraser to vote and/or we have alcohol wipes to wipe the screens. On Election Day, voters don’t actually touch the machine when they feed their paper ballot through.
- Can we set up sit down interviews with the production team for you, the mayor and Jonatan at the event? Yes to me and Jonatan. The Mayor is only available from 10:10:30am. My plan was to have a welcome/introductory
Hi Saralynn,

I will get through the bulk of your email a little later today. However, I want to be very clear from the get-go that this is a City media event and City messaging. We will not be collaborating with the County on this event.

Thanks!

Claire

Hi Both!
Thanks for this info Claire, I've got just a couple questions and suggestions.

First off I love the ideas for PPE and the voting machine ideas. Especially because the express machine has a great user interface that I think people have a higher level of trust in.

The ideas42 team has done a lot of A/B testing around messaging as a part of their campaign Guardians of Democracy. Here is a link to their most recent iteration of the video. I think that having some narration from your officials that mirrors this language would be great. Patrice can either get or pull similar B-Roll too. Also I'm including a script from their recent spots:

I'm Kathy. I've lived in Wisconsin for nearly 30 years. I'm a Chief Election Inspector in Ozaukee County. I love this country and if there is one thing I take seriously it is protecting your vote. I'm here to tell you that we have safeguards in place that ensure your vote will be counted accurately. We have strict checks and balances that document every vote that's matched to every voter. Because, there is nothing more important than the integrity of your vote. Text on Screen: Thank you to Kathy and all the Guardians of Democracy who are protecting our vote.

Who do you think would be best to deliver this message? I'd love to see Julietta joining this day and being filmed for a spot if you're open to it Claire.

To clarify about the location, would Central Count normally have been at the warehouse? Where will Central Count be this year? I ask because, and I'm brainstorming here, if it's possible to get any footage at Central Count

Isabel, thank you for speaking this evening with Saralynn. We're excited to work together on a coordinated plan.

On our end, we'll accelerate grant approval so that we can move forward expeditiously.

Enjoy (?) the debate and talk to you all tomorrow,
Michael

On Tue, Sep 29, 2020 at 7:53 PM Christenson, George <George.Christenson@milwaukeecountywi.gov> wrote:

Dear David & Lauren,

My office has been working with Michael at the National Vote at Home Institute (NVAHI) since August to identify ways NVAHI can help Milwaukee County expand its voter education and outreach. I am aware that they are also working with city. In fact, Claire made the introduction.

According to Michael, NVAHI may be able to provide Milwaukee County with a grant to offset design and production costs as well as make additional media buys.

As you can see, I am actively working to make our relationship work and hope to hear back from someone at CMR soon.

Sincerely,
Hi Claire,

Couple things for you:

1. Do you need any PPE, either for poll workers/your staff or for voters? We have a few partners offering masks, face shields, gloves and hand sanitizer.

2. We need to schedule a follow-up to go over Central Count training with you and Mike.

Does tomorrow (11-1 or 2-4), Thursday afternoon (after 3:30), or Friday afternoon (12-3) work? Can also look at next week if that would be better.

As a reminder, we discussed covering:
- steps for resolving discrepancies between the ballot count and machines (do you call this reconciliation?)
- recommended processes
- frequently-asked questions
- other topics for the training video and other materials

Hope your week is going ok so far. Feel like with all the legal uncertainty, the only thing to do is to just keep pushing forward and hope it doesn’t lead to total chaos.

Michael

Hi All,

Thank you so much for joining the Milwaukee Election Commission partnership meeting on Thursday, September 24. As promised, we have created a folder on Google Shared Drive that will house all creative assets that we’ll be developing. We are currently in the process of creating additional assets and will be uploading on an ongoing basis.

MEC Votes Count in 414

**To stay on top of new creative assets please “bookmark” this link to your web browser.**

At the moment you’ll be able to find the following:

- Partnership meeting recording and PPT deck

Subject: Ballot Cure

Could you send me screenshots of what WisVote displays when an absentee envelope needs cure.

A sample of the Excel file that is exported from WisVote and Google sheet that is used making the follow up calls.

Josh is asking about the Google Sheet "If it's sufficient for these purposes then we can back off on the design :) But if it could use a face lift for user experience, then let's go for it."
Just passing along questions from USDR and CTCL.

Subject: Procedures

If you read the procedures, I don’t think there is any “loophole.”

(a) The board of absentee ballot canvassers shall first open the carrier envelope only, and, in such a manner that a member of the public, if he or she desired, could hear, announce the name of the absent elector or the identification serial number of the absent elector if the elector has a confidential listing under s. 6.47(2). When the board of absentee ballot canvassers finds that the certification has been properly executed and the applicant is a qualified elector of the ward or election district, the board of absentee ballot canvassers shall enter an indication on the poll list next to the applicant’s name indicating an absentee ballot is cast by the elector. The board of absentee ballot canvassers shall then open the envelope containing the ballot in a manner so as not to deface or destroy the certification thereon. The board of absentee ballot canvassers shall take out the ballot without unfolding it or permitting it to be unfolded or examined. Unless the ballot is cast under s. 6.95, the board of absentee ballot canvassers shall verify that the ballot has been endorsed by the issuing clerk. If the poll list indicates that proof of residence is required and no proof of residence is enclosed or the name or address on the document that is provided is not the same as the name and address shown on the poll list, the board of absentee ballot canvassers shall proceed as provided under s. 6.97(2). The board of absentee ballot canvassers shall mark the poll list number of each elector who casts an absentee ballot on the back of the elector’s ballot. The board of absentee ballot canvassers shall then deposit the ballot into the proper ballot box and enter the absent elector’s name or poll list number after his or her name on the poll list.

Hi Ryan,

First, I cannot say how amazing Omar has been with helping us rewrite our election manual for poll workers, drop boxes and implementing the new automated mailing equipment. He truly has been a godsend!

Full-time staff have a good handle on processes and procedures around the automated mail equipment now and drop boxes, and I am coming up short on any other projects where we could use Omar's skillset. I know you and Jonatan had a meeting about constant contact news blasts to poll workers. However, that doesn't seem like a full-time project or that it would require an in-person deployment.
Hi Ryan,

As I told you on Thursday, my main concern was not having enough higher-level work to keep Omar occupied over the next month. I also just didn’t know the full timetable for how long we could “have” him.

Omar and I talked, though, and I could definitely still use his project management on Central Count. Part of me is extremely protective of Central Count and I want to do everything around it. However, that clearly isn’t feasible and Omar is likely the best person to delegate and help create processes and procedures to ensure a smooth Election Day.

Let’s plan on him staying in Milwaukee for now. I now know that the expectation was for him to be here through Election Day and will stop feeling like there are days where I am not using his brain enough. ☺

Thanks!

Claire

Claire,

Omar mentioned that you’ve realized you have a couple projects that you’d like help with. We’re psyched to have him provide that assistance.

Do you have a sense of the timeline over which you’ll want Omar’s help? Feel free to put forward an expansive estimate. Talking with Noah, the partner at the Elections Group, we touched on the idea that this is the season when unanticipated challenges keep turning up. It can be good to have someone on hand as the reserve player who doesn’t have specific oversight responsibilities, and can move into the breach.

On the other hand, if you’re pretty clear that it will just be the call program, DS850 instructions and the election day mail ballot workflows with NVAHI, we were thinking that might take 5-8 days. We might plan to deploy him in Detroit after that.

Bottom line, we had expected that Omar would be in Milwaukee through election day, so we can definitely plan around that. Just give us a sense of what you’re thinking. Feel free to give me a call if you want to talk this over a bit.

I am tailoring the Elections Group log for our chain of custody procedures. It really is fabulous.
Other jurisdictions often add Retrieval Team capacity as much as a week before election day. Some jurisdictions double for several days, and then go to 4x on Monday. You (or Omar and I) can monitor how the numbers are trending as we get closer, and consider when/whether to add a 2nd team. We can provide 2-route and 4-route versions, to be used at the point that you add capacity, if you choose to.

Hi,

I wasn't sure whether this would be RITS-ticket-worthy or not. I was wondering if the City has any type of database file that lists the city address with census tract. We are trying to overlay our voting data with census tracts and addresses seems to be the most efficient way. The group I am working with says that the census data for this info is less than accessible. I thought that since Map Milwaukee has Census 2010 data, it might exist in a CSV file or something similar.

Thanks!

Claire

Claire Woodall-Vogg
Executive Director
Can you send me that REST URL? I can take a look. In short, we are looking for a 1-to-1 mapping of a street address and Census Tract.

**Subject:** FW: Census Tracts Question

Hi Hannah,

I’m looping in a whole bunch of people who are working on the tool from Quickbase that can likely answer the question about what we are looking for more accurately than I can. In short, they are building a tool that overlays voting data with census data so we can get a better picture of trends and demographics within voting (which surprisingly doesn’t exist already!).

Thanks!

Claire

Thanks. It looks like a lot of this content is intended for the visualization layer. We aren’t quite there yet. Is there somewhere in this data that we can find a more streamlined set of data? Or is what you are suggesting that we would need to take the coordinates from the Census boundaries and correlate that to the coordinates of address boundaries?

Another way to ask the question would be, how would you use this data to find out the Census Tract associated with this address: 726 W GALENA ST APT 103, MILWAUKEE, WI 53205-2203

Subject: RE: Census Tracts Question

Hi Hannah –

I’ll try and do a better job clarifying the current need. We are not actually using anything visual right now (though will in the future). In the state of affairs now, we are just looking for raw data. The end result of this data will be some formulas, algorithms and reports that cross reference information about ballots and the census data. For example, we want to deliver to Milwaukee + Votethome answers to questions like “How many of age residents are also registered to vote?” or “what percentage of ballots are unreturned in areas with predominantly minorities?”. To do that, we need a clear link between address + Census Tract. We need this for all ~300k voters and the ~200k+ absentee ballots, and it needs to be able automatic as we perform more inserts. To accomplish this, we were making calls to the Census API. They allow you to pass in an address and get the Census Tract. That solution “works”, but is far too slow. Their batch solution isn’t working either.

So, we are looking for a single file that has all addresses and Census Tracts. We could then keep those stored in the application and do the joins. Does that help?

Harrison Hersch
Let me make sure on the apartment numbers/suffixes before I let you know.

The two files would be the same data-wise. Using ArcMap, I can export the joined files to an Excel/CSV table. So the shapefile could be loaded to see it visually into whatever system you are using and the Excel/CSV would be a table of all the same fields without shapes. Does that help?

Hi Hannah –

Unfortunately we don’t have any sort of visualization/GIS software to open this or leverage as we are a database/application platform.

Are you able to export in chunks or is that too much work? Could you give us a JSON file? We could take virtually any sort of file that has the relational data like csv, tsv, xls, json, xml, etc.

Subject: RE: Census Tracts Question

No problem. Not a delay, just want to plan.

Harrison Hersch  
Director, Product Operations
Sounds good, thank you much, Michael. Just let me know.

Give me a day or so. I'm waiting to hear back about whether USDR can make this all easier and save you from more work, Hannah.

Thanks,
Michael

Ah, I see. Yes, I could break the city into chunks and export as a CSV, if needed.

Michael, please let me know if that is the route you want to go.

Good afternoon, and happy mailing deadline day!

We finally have a Spanish translation for the uniform absentee instructions (attached). I am also attaching a Voter ID Pocket Guide, which Asher at the Center for Civic Design was kind enough to design.

I am anxiously waiting for a Spanish translation of our Create Your Safe Voting Plan website. If you’d like a copy of the translation once it arrives, just let me know.

Subject: Census Tracts Question

Hi,

I wasn't sure whether this would be RITS-ticket-worthy or not. I was wondering if the City has any type of database file that lists the city address with census tract. We are trying to overlay our voting data with census tracts and addresses seems to be the most efficient way. The group I am working with says that the census data for this info is less than accessible. I thought that since Map Milwaukee has Census 2010 data, it might exist in a CSV file or something similar.

Thanks!

Claire

No problem that this is not a RITS ticket at this time. Can I ask what program you are trying to use this data with? Our Census and parcel data can be found at our REST endpoint by URL but I am unsure if what you are using takes in this format.

Hi Hannah,

I'm looping in a whole bunch of people who are working on the tool from Quickbase that can likely answer the question about what we are looking for more accurately than I can. In short, they are building a tool that overlays voting data with census data so we can get a better picture of trends and demographics within voting (which surprisingly doesn't exist already!).

Thanks!

Claire

Hey Claire,
Hi Hannah!

Can you send me that REST URL? I can take a look. In short, we are looking for a 1-to-1 mapping of a street address and Census Tract.

Harrison Hersch

Director, Product Operations

O: (617) 250-2156
Thanks. It looks like a lot of this content is intended for the visualization layer. We aren’t quite there yet. Is there somewhere in this data that we can find a more streamlined set of data? Or is what you are suggesting that we would need to take the coordinates from the Census boundaries and correlate that to the coordinates of address boundaries?

Another way to ask the question would be, how would you use this data to find out the Census Tract associated with this address: 726 W GALENA ST APT 103, MILWAUKEE, WI 53205-2203
